I would like to invite Sr. Erbard and President Morales to join me here in La Paz, Baja California Sur, so that I might enlighten the both of them as to the influence America has on their two nations, and how it manifests. I believe that by showing President the precise nature of how America controls Mexico's marine concessions and Navy; that he may be able to fight against the corrupt American influence in his country.

I will of course make my agenda available beforehand, as a matter of compliance with any security concerns. I am an American, and therefore should not be trusted at face-value. In light of this, I am more than willing to outline my agenda. For now, the goal of my efforts is to demonstrate to both Señor Erbard and President Morales the nature and extent of corruption as I have witnessed, uncovered, and investigated it here.

Please advise.

Regards,

Michael Wolf
