Re: Fwd: trespassing to Kastor Industrial Pichilingue, México

From: Jorge Ayala León <jayala1601@gmail.com>

To: Michael Wolf <disperser.wolf@mail.ru>

I always told you that, the ownership of the land was Kastores, but never believe me.

I can not recomend you anything, I don't know, whom has the reason in all these problems and, I can not participate in private issues, so, I only can to wish you that everything will be all right.

My best regards.

Jorge Ayala

Subject: trespassing to Kastor Industrial Pichilingue, México

Mr. Michael Wolf,

you have trespassed the property of Kastor Industrial Pichilingue over a back yard fence which was destroyed due to a hurricane, You broke locks and changed padlocks all over the building.

Your boat "Disperser" is at our neighbours Cantamar.

We know about your intention to sell Kastor Industrials possessions (a AS7063 hoist and other items which are in a blue container) as you have sent e mails to different companies claiming you are the owner of the items, We have the invoices proving Kastor Industrial is in LEGAL ownership.

We have these E-Mails and they will be used against you without hessitation.

What you are doing is illegal and we will sue you under mexican laws unless you leave Cantamar and La Paz immediately after leaving a guarantee of 5,000.00 pesos (should be more!) in advance at Fernandos place the owner of Cantamar.

We demand the repair of broken locks or damaged property immediately. We will give you instructions very soon as we quantify the damage .

We may think SRE, Immigration authorities in Mexico will surely be very interested in your immigration status, we

assume is not legal.

You know we have mexican law at our side. Do not try to mess it up more than it, is right now.

Please acknowledge that we do not want to harm you, unless you insist us to defend legally. Our attorney (CSL/LAP) is already informed and waiting for further instructions.

This is the first and a last warning Mr. Wolf.

We expect an answer to this e-mail acknowledging the reception. Otherwise we may look for further alternatives contacting you.

Respectfully

El representante legal de Kastor Industrial,

Lote 5 Mz F, Parque Industrial Pichilingüe , La Páz, BCS, México , KIN 081211-2P2

more proof Mr. Wolf?

Greetings, I have in my possession a new, never used, Stahl AS7 2/1 single wire rope hoist. I would like to find out if you believe I could use this crane in a boatyard situation to hoist and move boats. I would of course be responsible for rigging, but am interested in your input on the setup and use of a Stahl crane over water and in a marine application which I believe is likely novel. My reasoning here is simple: I have a crane and a boatyard. I have no other equipment to haul boats out. I believe it is entirely possible to create a crane system using the AS7 to lift boats out of the water and move them into position for storage or work using the AS7. The alternative system I am considering is a fixed installation to directly pull a cart out of water with a boat on it. There are two options, with, or without track for this option. It may be entirely possible I may need to set up for both options. I have a brochure for the product and will be studying it for ideas, but would appreciate your input as well. Finally, I may acquire other equipment more well suited (and already used for) this application and as such may be interested in selling this equipment, which was manufactured in 2003 and never used. I would be grateful for your input on how to sell it on the used market, and will also consider offers from Stahl or dealers for buying it back. Thank you, Michael Wolf
